SUMMARY

Software Engineer at PayPal with 1+ year of experience building scalable web applications using React, TypeScript, JavaScript, and modern frontend technologies. Published AI researcher with four peer-reviewed IEEE and PeerJ publications spanning Machine Learning, Natural Language Processing, Explainable AI, Healthcare AI, and Time Series Forecasting. College Third Rank Holder and Gold Medalist in Artificial Intelligence & Machine Learning. Passionate about building AI-powered products, scalable software systems, and intelligent full-stack applications.

WORK EXPERIENCE

Software Engineer — PayPal

Jul 2025 – Present

- Worked on crucial, high-priority projects under tight timelines, delivering scalable frontend applications using **React**, **TypeScript**, **JavaScript**, **HTML**, and **CSS**.
- Served as an on-call engineer, debugging production issues, performing root-cause analysis, and supporting reliable customer-facing systems under pressure.
- Contributed to **Agentic AI** initiatives by implementing **MCP**-based workflows and automation to improve developer productivity.
- Built reusable UI components following accessibility (WCAG), responsive design principles, and maintainable frontend architecture.
- Collaborated with cross-functional teams to integrate REST APIs, automate repetitive workflows, and deploy production-ready features using Git, Agile, and CI/CD practices.

Freelance Frontend Developer — Doon International School, Hyderabad

2025

- Designed and developed the official school website with emphasis on responsiveness, accessibility, and user experience.
- Built reusable frontend components and optimized website performance across desktop and mobile platforms.
- Collaborated directly with stakeholders to gather requirements, implement design improvements, and deliver production-ready solutions.
- Managed deployment, maintenance, and post-launch feature enhancements.

AWS Intern — APSSDC

May 2023 – Aug 2023

- Deployed applications using **AWS cloud services** and gained practical experience with cloud infrastructure and deployment workflows.

Flutter Developer Intern — Bragtech

May 2023 – Aug 2023

- Developed cross-platform mobile applications using **Flutter** and **Firebase** while implementing responsive user interfaces.

Android Developer Intern — Aerial Topographic Services Pvt. Ltd.

Mar 2023 – Apr 2023

- Built Android applications with **Firebase** integration and implemented secure authentication and CRUD functionality.

ACHIEVEMENTS

- **Gold Medalist – Artificial Intelligence & Machine Learning**

- **College Third Rank Holder** with CGPA: 9.48/10.
- **Gold Medal – Research Day** for *Enhancing Machine Learning-based Forecasting of Chronic Renal Disease with Explainable AI*.
- **First Prize – Mahindra University Research Symposium** for patented innovation recognized for originality and impact.

PUBLICATIONS (4 PEER-REVIEWED)

Comparative Analysis of Time Series Forecasting Models: Evaluating Hybrid Approaches and FB Prophet for Optimal Performance 2025
S. Singamsetty, M. Chimata, J. L. Manohar, M. S. Nandan, M. K. Enduri — CONIT, IEEE.

Enhancing Machine Learning-based Forecasting of Chronic Renal Disease with Explainable AI 2024
S. Singamsetty, S. Ghanta, S. Biswas, A. Pradhan — PeerJ Computer Science, 10:e2291.

Employing TF-IDF and Word2Vec Embeddings to Identify Multi-Class Toxicity Through Machine and Deep Learning Approaches 2024
S. Singamsetty, H. Somayajula, A. L. Immadisetty, K. S. Konkimalla, S. Tokala, M. K. Enduri — OCIT, IEEE.

Predicting Machine Learning for Early Diabetes Mellitus Prediction 2024
S. Singamsetty, M. S. Nandan, S. S. C. Polu, J. L. Manohar, S. Tokala, M. K. Enduri — BTS-I2C, IEEE.

SELECTED PROJECTS

React Learning – Full-Stack ML Web App

[GitHub](#)[Live Demo](#)

Built a full-stack ML-enabled web application using **React**, **Node.js**, and **Express**, integrating secure user data handling, REST APIs, and an interactive UI.

Early Chronic Kidney Disease Prediction with Explainable AI

[GitHub](#)[Live Demo](#)

Developed a healthcare AI tool using clinical datasets, machine learning models, and explainability techniques; deployed on **Hugging Face Spaces** for real-time predictions.

Personality Explorer – NLP & Transformers

[Live Demo](#)

Designed and deployed an NLP personality prediction tool using transformer-based models, **Hugging Face Transformers**, and **Streamlit** for real-time text analysis.

SKILLS

Programming Languages

Frontend

Backend

Databases

Machine Learning & AI

Cloud & Tools

Core CS

Java • Python • C++ • JavaScript • TypeScript

React.js • Next.js • HTML5 • CSS3 • Tailwind CSS • Redux

Node.js • Express.js • REST APIs

MongoDB • Firebase

Machine Learning • NLP • Explainable AI • GenAI • Transformers • Hugging Face • TensorFlow • Scikit-learn • Pandas • NumPy • Streamlit

AWS • Git • GitHub • Docker • Postman

Data Structures & Algorithms • OOP • Operating Systems • DBMS • Computer Networks • System Design

Interests: Artificial Intelligence • Machine Learning • Generative AI • NLP • Full Stack Development • System Design • Software Engineering

EDUCATION

2021 – 2025	Bachelor of Technology (Computer Science Engineering), SRM AP University (CGPA: 9.48/10) College Third Rank Holder — Gold Medalist – Artificial Intelligence & Machine Learning	
2019 – 2021	Class XII, State Board – Chaitanya College	(954/1000)
2019	Class X, CBSE – Atkinson Senior Secondary School	(384/500)
